

1. Identify which of your values you want people to notice most and your most valuable technical strengths in your SWOT analysis.

2. Think about 2 different situations in which you performed successfully and applied your key values and strengths.

3. Use the questions on the right categorized into **Challenge**, **Choice**, and **Outcome** to deconstruct your success in terms of your values.

CHALLENGE.

Identify the challenge you addressed successfully. What values drove you to recognize and respond to the challenge?

CHOICE.

What information did you process to analyze the challenge? What experiences influenced your solution? What actions did you decide to take?

OUTCOME.

What information did you process to analyze the challenge? What experiences influenced your solution? What actions did you decide to take?
